High Performance Sustainable Base Oils

A superior product

Lwart Environmental Solutions Group II base oils are a product line developed to offer high performance alternatives for the lubricant industry through a broad portfolio of specifications **that meet the most demanding market requirements.**

We have the only hydrotreating plant in Latin America and the **largest GII single line re-refining production in the world.**

Our production of Group II base oils is a pioneer in Brazil and is only possible through a highly efficient and stable process that increases purity and promotes the **restructuring of the oil at the molecular level.**

We have been able to extend the product life cycle – from collection to re-refining – with a golden touch, returning to the market as a product as good as the one originally manufactured. **The planet thanks you!**

Group II oil qualities:

**HIGH
PURITY**

**OXIDIZATION
STABILITY**

**THERMAL
STABILITY**

**LOW SULFUR
CONTENT**

**LOW AROMATIC
CONTENT**

**LOW
VOLATILITY**

Quality control

Lwart has a specialized Technology Center, with state-of-the-art equipment and trained researchers to ensure the quality, stability and performance of its processes and products.

Application versatility

Oils of this type have high performance and can be used in various industrial such as automotive, food grade lubricants, insulating oils, agricultural adjuvants, among other applications.

Lwart Standard os excellence

Supply guarantee: We are the only national producers. More security on the way from our plant to our customers.

Flexibility and safety in delivery: We have our own tracked fleet, which guarantees agility and transparency.

Save time and money: Our base oils already have the main approvals needed for the market.

Be part of this cycle!

When you choose Lwart Environmental Solutions to collect used oil or buy our products that stem from re-refining, you become part of a virtuous cycle that contributes to the sustainable development of the country and the preservation of nature. Be a part of the change!

In a time where environmental awareness is so prominent, we are proud to offer an excellent product from a residue that could contaminate the environment.

Lwart Environmental Solutions: more than oil

We believe that the preservation of the planet is the responsibility of everyone. That is why our work is based on the concept of a circular economy: collect, allocate and transform finite natural resources and give them new life!

In 2020, we expanded our area of operation in reverse logistics, starting to collect, allocate and transform plastics, filters and tow*, among other things. Thus our new name was born:

Lwart Environmental Solutions.

Count on us and help bring awareness to your customer of the importance of correct waste disposal
